# Decorative Glass

Decorative glass has been used through the ages to imbue windows and doors with beauty, style and elegance. This ancient yet timeless craft has enjoyed a revival over the last 20 years as modern home owners have discovered its ability to add character, charm and originality to their doors and windows.

## TRADITIONAL FANLIGHTS

Adding the personal touch of a leaded, coloured glass effect to a fanlight or door is very simple to achieve. Our definitive range of styles is inspired by the decorative influences of past ages and includes classical and traditional floral designs as well as 'art nouveau' and contemporary images. Each design is carefully prepared using high specification, colour-stable polyester film with built-in UV inhibitors and natural finish pure lead strip. The designs are equally as effective when applied to clear or patterned glass.

## BEVELLED GLASS FANLIGHTS

Clear bevels - Clear glass bevels provide exceptional depth and radiance with their three dimensional brilliance. They are hand made from 5mm glass and when combined with lead profiles and coloured glass effect films, they create a stunning focal point for any fanlight design.

## GLUE CHIPPED GLASS BEVELS

A further option, and one that gives our bevel designs an added dimension, are clusters with a textured surface finish. By enhancing the relief effect they bring a spectacular sparkle to our designs. They are made by glue-chipping the glass - a traditional technique that creates a fern effect of clear and frosted glass.

## COLOURED GLASS BEVELS

Why not bring a natural splash of colour to your bevelled glass design with our range of multi-coloured dusters? Choose from blue, green or bronze to further enhance the radiance and three-dimensional bevel effect, through the changing depth of colour when viewed from different angles.

## GLASS JEWELS

As you would expect, a design using our range of glass jewels is certainly more exquisite. They are available in five striking colours – amethyst, aquamarine, blue, green and red as well as clear. Their extra facets create an even more stunning effects and they work beautifully in designs that incorporate glass bevels and coloured films.

## BEVELLED DOORS – HALF GLAZED

By creatively combining the essential elements of colour, light and the subtleties of shape and shade, decorative glass panels can transform any entrance way into an artistic statement of elegance and style. Our striking range of lead strip, which in addition to natural lead includes the options of Brass, Platinum, Antique and Ebony finishes, uses special weather and age-tested coatings. We have a wide selection of high specification polyester films combining technology with artistic flair to produce a stunning range of colours and textures.

# Decorative Glass options...

Olympic Glass can now offer a full design service to suit all styles and tastes of Decorative Glass requirements. Using the very latest design software and plotter/cutter equipment our in-house design team can offer customers a whole range of new options to help create a totally unique decorative feature that will enhance any home or business premises.

Olympic Glass can create bespoke stained art glass window and doors or sandblasted glass designs that will give individuality, character and beauty to any home or business.

Simply provide us with your idea, picture, or corporate logo and let our design team transform your glass requirements into a work of art or simply choose from our library of hundreds of designs that will help bring that splash of colour or feature to any home or business.

## **DECORATIVE SANDBLASTING**

Glass sandblasting is just one of the extra services that we offer in house. Blasted glass still allows a large amount of light to transmit through the glass, whilst maintaining privacy. Designs can be blasted onto the glass through a vinyl which can be used to create either a negative or positive image for a one-off original design.
